Content Disclaimer

The content of this book is academic research and thought experiments; its analysis is based primarily on historical data and published literature. The author has twelve years of experience in macro strategy research at financial institutions and currently holds no securities investment advisory license. This book does not constitute investment advice, technical implementation advice, or policy advice, nor a recommendation or an offer with respect to any security, financial product, or trading strategy. Readers should exercise independent judgment and bear the risks of their own decisions. Past performance is not indicative of future results.

Complete Book Outline (English Edition)：The Clock Room and the Macro-Cognitive Accounting Framework—Mapping-Chain Analysis of AI, Finance, and Algorithmic Platforms

---

Preface: Clocks and Time

Volume I: Thought Experiment and Core Theoretical Foundations (ch01–ch08)

Chapter 1: The Clock Room—Thought Experiment

- Abstract
- Keywords
- Pre-reading Note: On the term "fiber"
- §1 The Clock Room
  - 1.1 The Minimal Setup
  - 1.2 How Four Problems Are Generated from the Same Room
  - 1.3 Why Intuitive Strategies Fail
  - 1.4 The Piling Up of Clock Quantity (N)

- §2 The Most Precise Clock-Maker
  - 2.1 von Neumann's Three Self-Negations
  - 2.2 The Baroque Diagnosis
  - 2.3 What This Means for the Clock Room
- §3 From Shadow to Fiber
  - 3.1 The Shadow Metaphor
  - 3.2 Fiber: A First Explanation
  - 3.3 Translation Table
  - 3.4 Formal Definitions
  - 3.5 Proposition and Proof
  - 3.6 Closed-Loop Pseudo-Calibration
  - 3.7 Connection to Measurement Theory
- §4 The Three Layers of Irreversibility
  - 4.1 Layer 1: Information Deficit
  - 4.2 Layer 2: Dynamic Corrosion
  - 4.3 Layer 3: Ontological Dimension Reduction
  - 4.4 Summary Table
- §5 Working on Clocks vs. Working in Time
  - 5.1 Two Modes of Work
  - 5.2 The Time Dimension and the Clock Dimension
  - 5.3 Entering the Clock Dimension
- §6 The Contemporary Clock Room
  - 6.1 AI Alignment and the Helpful, Honest, Harmless (HHH) Trilemma
  - 6.2 The Chinese Room and the Clock Room
  - 6.3 The Mediation Problem
- §7 Conclusion
  - 7.1 Self-Reference
  - 7.2 Core Judgment
  - 7.3 From Epistemology to Bookkeeping
- References
- Footnotes

Chapter 2: Viewing the Clock Room Across Millennia of Philosophical History—A Comparison of Eastern and Western Approaches to the Mapping Gap

- Abstract
- Keywords
- §1 Two Paths for the Mapping Gap (the Ineliminable Distance / Interval Between Mapping and the Real)
- §2 The Western Path: Building Better Clocks
  - 2.1 Plato: The First Person to Systematically Address the Problem of Shadows
  - 2.2 Descartes: Philosophizing the Situation of the Person in the Room
  - 2.3 Kant: Acknowledging the Distance as Unbridgeable
  - 2.4 Hegel: Attempting to Bridge Through Dialectics

  - 2.5 From Plato to Hegel: A Progressive Structure
  - 2.6 Husserl and Heidegger: Phenomenology's Revolt Against the Bridge-Building Tradition
    * 2.6.1 Husserl: The Garb of Ideas Concealing the Lifeworld
    * 2.6.2 Heidegger: The Enframing of Technology and Resonances with the Turn Eastward
- §3 Important Ontological Nodes in the East
  - 3.1 Laozi: The Dao That Can Be Spoken Is Not the Constant Dao
  - 3.2 The Diamond Sutra: Sands of the Ganges and Recursive Self-Negation
  - 3.3 Huineng: Between Delusion and Awakening
  - 3.4 Lu Jiuyuan and Wang Yangming: The Mind Is Principle and the Extension of Innate Knowledge
    * 3.4.1 Lu Jiuyuan: The Mind Is Principle
    * 3.4.2 Wang Yangming: The Unity of All Things Through Humaneness (ren) and the Extension of Innate Knowledge
  - 3.5 The Common Zone of the Four Nodes
- §4 A Modern Convergence
  - 4.1 Marx: The Inversion Setting Out from Within the Western Tradition
  - 4.2 A Zone of Mutual Recognizability
- §5 The Clock Room at the Intersection
- References
- Footnotes

Chapter 3: The Macro-Cognitive Accounting Framework (MCAF)

- Abstract
- Keywords
- §0 The Genesis of the Problem: Two Asymmetries
  - 0.1 What Computing Power Conquered, and What It Did Not
  - 0.2 Another Asymmetry Diagnosed by von Neumann in 1955
  - 0.3 The Formal Isomorphism of the Two Asymmetries
  - 0.4 The Task of This Chapter
- §1 The Cognitive Extension of Double-Entry Bookkeeping: From Finance to Information
- §1a The Applicable Boundary of the Framework: Minimal Counterexample and Minimal Delimitation
- §2 The Meta-Formula and the Six Variables
  - 2.0 The Meta-Formula
  - 2.1 Unlocked Stock (C)
  - 2.2 Media Conductivity Coefficient (Λ)
  - 2.3 Narrative Load (ϕ)
  - 2.4 Meta-Audit Capacity (A)
  - 2.5 The Human Biological Substrate (E_c)
  - 2.6 The Legitimacy Base ($\|L\|$)
  - 2.7 The Asymmetry of Growth and Maintenance Conditions
  - 2.8 The Action Criterion for the Positions of Bearers
- §3 Temporal Structure: Three Clocks and the Time Signatures of Variables
  - 3.1 Time Signatures of the Variables

  - 3.2 Definition of the Three Clocks
  - 3.3 Structural Ordering
  - 3.4 The Bifurcation at the Individual Level and the Institutional Level
  - 3.5 Presentism as a Sociological Symptom of the Temporal Crisis
  - 3.6 Summary of Variable Time Signatures
- §4 The Dynamics of Cognitive Debt
  - 4.1 Four Forms
  - 4.2 The Three-Stage Lifecycle
- §5 Three Derived Indices
  - 5.1 Narrative Leverage Ratio (Ω)
  - 5.2 The Cognitive Reynolds Number (Re_c)
  - 5.3 Cognitive Friction (μ_c)
- §6 Five Structural Postulates
  - 6.1 Postulate 1: Technological Expansion Is the Product of Competitive Power-Selection
  - 6.2 Postulate 2: Local Optimization and Global Optimization Are Incommensurable
  - 6.3 Postulate 3: Meta-Audit Is Continuous Work against Entropy Increase
  - 6.4 Postulate 4: The Legitimacy Base Accumulates Slowly but Collapses Rapidly, and the Succession of Diversity Cannot Be Accelerated
  - 6.5 Postulate 5: The Topological Structure of Historical Scenes Allows Cross-Period Pattern Recognition
- §7 Epistemological Delimitation and Operationalization Boundary
  - 7.1 The Mathematical Meaning of the Variables and the Residual
  - 7.2 The Three-Level Epistemological Demarcation
  - 7.3 Three Kinds of Irreversibility Facing the Framework Itself
  - 7.4 Transition of Proxy Indicators
  - 7.5 A Minimally Theory-Laden Observation Interface
  - 7.6 Boundary Statement on Quantitative Development
- Conclusion: Discretization as Meta-Operation
- References

Chapter 4: Fiber—The Possibility Space Between Observation and Truth: A Conceptual Analysis Framework

- Abstract
- Keywords
- Pre-reading Note: On the term “fiber”
- §1 Introduction: From Mathematics to Epistemology
- §2 Formalization of the Fiber Framework
  - 2.1 Basic Definitions
  - 2.2 Visible Subspace and Hidden Subspace
  - 2.3 Ordinal Comparison of Fiber Size
  - 2.4 The Pseudo-Small Fiber
- §3 Structural Isomorphism with the “Clock Room”

  - 3.1 Resonance of Core Structures
  - 3.2 Neither Is Reducible to the Other
- §4 Conceptual Complementarity with the MCAF Framework
  - 4.1 Fiber as an Analytical Tool for the MCAF Framework
  - 4.2 The MCAF Framework as the Bookkeeping Discipline for Fiber
  - 4.3 Neither Is Reducible to the Other
- §5 Resonance and Divergence with the Hermeneutic Circle Theory
  - 5.1 Structural Isomorphism and Divergence
  - 5.2 Difference in Emphasis
  - 5.3 Complementary, Not Substitutes
- §6 Applicability Conditions and the Diagnostic Power Spectrum
- §7 Conclusion: Annotating the Fiber
- References
- Footnotes

Appendix A: A Scholarly Review of the Fiber Framework

- Abstract
- Keywords
- §1 Introduction: The Academic Genealogy of the Fiber Concept
- §2 Mathematical Origins: The Rigorous Formalization of Fiber Bundles
  - 2.1 Steenrod (1951): The Topological Foundation of Fiber Bundles
  - 2.2 From Mathematics to Epistemology: The Abstraction of the Concept
- §3 Philosophy of Physics Tradition: Observation Depends on Reference Frames
  - 3.1 Bamonti (2024): Reference Frames and Physical Perspectivalism
  - 3.2 Comparison with This Paper's Fiber Framework
- §4 A Kindred Term in AI Evaluation: fibristic epistemology
  - 4.1 Bouattoura (2025): Fibristic Epistemology for AI Tool Evaluation
  - 4.2 Comparison with This Paper's Fiber Framework
- §5 Measurement Theory and Econometrics Traditions
  - 5.1 Krantz et al. (1971): Representational Measurement Theory
  - 5.2 Manski (2003): Partial Identification
  - 5.3 The Connection to Auditing and Cross-Period Accountability
- §6 Information Theory and Machine Learning Traditions
  - 6.1 Shannon (1948): Information Entropy
  - 6.2 Tishby et al. (1999): The Information Bottleneck Method
  - 6.3 Vovk et al. (2005) and Angelopoulos & Bates (2023): Conformal Prediction
- §7 Sociology Tradition: Hermeneutic Circle Theory
  - 7.1 Zhao Dingxin (2022): The Hermeneutic Circle
  - 7.2 Resonance and Divergence with the Fiber Framework
- §8 The Academic Positioning of This Paper's Fiber Framework
- §9 Conclusion: Positioning on the Shoulders of Giants
- References

- Footnotes

Chapter 5: Non-Human Object Substitution and Psychosocial Homeostasis—Francis L. K. Hsu's Theory of Psychological Anthropology and the Ontological Foundations of the Defense Side

- Abstract
- Keywords
- §1 Paradigm Shift: From the Discrete Individual to Continuous Relations
  - 1.1 What Is Being Eroded
  - 1.2 Change of the Basic Unit
  - 1.3 Methodological Constraints
  - 1.4 Causal Direction: Cultural Configuration Precedes Technological Change
- §2 Psychosocial Homeostasis: The Static Structure
  - 2.1 The Eight Layers and the Core Region
  - 2.2 Role and Affect: From Distinction to a Functional Orthogonality Hypothesis
  - 2.3 Dynamics of Homeostasis: The Desire-Type and the Reciprocity-Type
  - 2.4 "The Human Constant": Semantic Shift from Driving Force to Capacity
  - 2.5 Static Mapping of Psychosocial Homeostasis onto the MCAF Framework
- §3 Non-Human Objects: The Precise Mechanism of Substitution
  - 3.1 Hsu's Diagnosis of Non-Human Object Compensation
  - 3.2 Bidirectional Causality: Non-Human Objects Manufacture the Demand for Non-Human Objects
  - 3.3 The Substitution Map
  - 3.4 Connection to the Dynamics of Chapter 1
- §4 Two Civilizational Topologies: Differentiated Pathways of Non-Human Substitution
  - 4.1 Dominant Kinship Dyad and Attribute Orthogonality Table
  - 4.2 The Traditional Chinese Homeostatic Ideal and Non-Human Substitution
  - 4.3 The American Homeostatic Ideal and Non-Human Substitution
  - 4.4 The Orthogonality of Two Vulnerability Lines
  - 4.5 Contemporary Comparison: An Interpretive Consistency Test Four Decades Later
    - 4.5.1 Structural Comparison: Organization Counts, Depth of Participation, and Loneliness Indicators
    - 4.5.2 Contemporary Comparison: Affective Polarization and Legitimacy Pressure
    - 4.5.3 The Clubification of Elites: From Club Dynamics to the Structure of Impunity
    - 4.5.4 Summary of Criteria
- §5 The State: The Historical Extension of Psychosocial Homeostasis and the Modulator of Non-Human Substitution
  - 5.1 The Political Power of the State and the Theory of the Dominant Kinship Dyad
  - 5.2 The Regulatory Fork: The Contemporary Folding of Homeostatic Ideals
  - 5.3 Different Modulations of Non-Human Substitution
- §6 Mutual Translation and Conclusion
  - 6.1 Semi-Modernity
  - 6.2 Four Criteria

  - 6.3 The Unity of Statics and Dynamics: From Anchoring to Substitution, Toward "Globalism Based on Time, Not on the Clock"
- Appendices
  - A.1 Japan (Iemoto): Role Audit and Affect Audit Are Not Separated
  - A.2 India (Caste/Mother-Son Axis): The Flight of Meta-Audit Capacity Toward the Supernatural
- References
- Footnotes

Chapter 6: Monopoly over the Mapping Function—From Priests to AI Platforms

- Abstract
- Keywords
- §1 The Institutionalization of Self-Referencing
- §2 Four Monopolistic Strategies
- §3 The Key Distinction: Is There Compulsory Calibration?
  - 3.1 Preliminary Comparison of Five Systems
  - 3.2 The Compensation Loop: The Institutionalized Form of Calibration
  - 3.3 Direct Interruption: When Neither the Compensation Loop Nor the Crash Is Available
  - 3.4 Classification Summary
- §4 Ancient Priests: Early Institutional Forms of Mapping Function Monopoly
  - 4.0 Scope and Object
  - 4.1 Unfolding the Four Monopolistic Strategies
  - 4.2 Four Structures of Priests and Kingship
  - 4.3 Four Paths of Disintegration
  - 4.4 The Function Has Not Disappeared
- §5 Financial Markets: A Self-Reinforcing Clock with Cyclical Error Correction
  - 5.1 Prices as the Self-Referencing Clock
  - 5.2 The Threefold Distortion of Calibration
  - 5.3 Crash as Compulsory Calibration
  - 5.4 "Finance Serving the Real Economy"
  - 5.5 Cryptocurrency: Crashes Exist, But No Direction of Calibration
- §6 Gaps in Compulsory Calibration of Diffuse Losses: From Algorithmic Platforms to AI Platforms
  - 6.1 Algorithmic Platforms: The Layered Knowledge Barrier
  - 6.2 AI Platforms: The Structural Knowledge Barrier
  - 6.3 Model Collapse: The Technical Mechanism of Self-Referencing
  - 6.4 HHH as the Product of Three Strategies
  - 6.5 Diffuse Losses and Residual Fissures
- §7 Boundaries of the Framework and Counterexamples
- §8 Falsifiable Conditions
- §9 Conclusion: Butcher Ding's Knife
- Statement on Levels of Evidence
- References
- Footnotes

Chapter 7: Fermi Estimation of the Cognitive Reynolds Number—Information-Arrival Pressure, Verification Capacity, and Debt Trajectories

- Abstract
- Keywords
- §1 Problem Formulation and Epistemological Constraints
  - 1.1 Media as the Historical Carrier of the Media Conductivity Coefficient (Λ)
  - 1.2 The Boundary Between the Physical Reynolds Number and the Quasi-Cognitive Reynolds Number
- §2 Denominator and Numerator
  - 2.1 The Human Biological Substrate (E_c): The Biological Constraint of Approximately 10 bits/s
  - 2.2 The Media Conductivity Coefficient (Λ): Irreducible to a Single Scalar
- §3 The Three Intervals of the Cognitive Reynolds Number (Re_c): Directional Judgment, Not Precise Measurement
  - 3.1 The Laminar Interval: The Information Arrival Rate on the Same Order of Magnitude as the Human Biological Substrate (E_c)
  - 3.2 The Transition Interval: Control of the Media Conductivity Coefficient (Λ) Begins to Migrate
  - 3.3 The Turbulent Interval: Convergence of Three Types of Evidence
- §4 The Age of AI Generation: Why the Simplified Form of the Cognitive Reynolds Number (Re_c) Is No Longer Sufficient
- §5 The Symbiosis-Parasitism Continuum: An Evolutionary Explanation of the Migration of Control
- §6 Conclusion: Definite Direction, Fuzzy Values
  - 6.1 Cannot Be Precisely Calculated
  - 6.2 Directional Judgments Can Be Made
  - 6.3 The True Value of the Cognitive Reynolds Number (Re_c)
- §7 Falsifiability Declaration
- References
- Footnotes

Chapter 8: Narrative Leverage Ratio and Narrative Arbitrage

- Abstract
- Keywords
- §0 Why This Chapter Is Needed
- §1 Definition of Narrative Leverage Ratio (Ω)
  - 1.1 Analogy: Financial Leverage
  - 1.2 Formal Definition
  - 1.3 Dynamics of Narrative Leverage Ratio (Ω)
  - 1.4 Relationship between Narrative Leverage Ratio (Ω) and Cognitive Reynolds Number (Re_c)
- §2 General Structure of Narrative Arbitrage
  - 2.1 Definition
  - 2.2 Sources of Profit
  - 2.3 Self-Reinforcing Feedback Loop

  - 2.4 Structural Differences Between Narrative Arbitrage and Financial Arbitrage
  - 2.5 Fiber Framework Interface: Pseudo-Small Fiber and the Cognitive Micro-Mechanism of Narrative Arbitrage
  - 2.6 Cross-Industry Engineering of Pseudo-Small Fibers
- §3 The Three-Layer Visible Structure of Narrative Arbitrage
  - 3.1 Product-Layer Narrative Arbitrage
  - 3.2 Infrastructure-Layer Narrative Arbitrage
  - 3.3 Capital-Layer Narrative Arbitrage
- §4 Termination Mechanisms for Narrative Arbitrage
  - 4.1 Natural Terminators in the Financial System
  - 4.2 Why Termination Mechanisms Are Absent in the AI Domain
  - 4.3 Generalizing Financial Governance Success as the Baseline for AI Governance Is a Form of Meta-Narrative Arbitrage
  - 4.4 "The Old Rules Don't Apply to Us": A Century-Spanning Discourse of Narrative Arbitrage
- §5 Extended Argument One: Evolutionary Dynamics of Projection Clock Acceleration (VSI and Discretization)
- §6 Extended Argument Two: Ideological-Layer Narrative Arbitrage and Four-Layer Coupling
  - 6.1 Epistemological Embedding of Training Corpora
  - 6.2 Cultural Presuppositions of Alignment Processes
  - 6.3 Silicon-Based Species Narrative and the Delegitimization of Auditing
  - 6.4 Structural Coupling with Individualism
  - 6.5 Arbitrage Structure
  - 6.6 Four-Layer Coupling
- §7 Four Actionable Pathways
- §8 Position and Boundaries of This Chapter
- References
- Footnotes

Appendix A: A History of Financial Advertising Regulation—A China-U.S.-Europe Comparison

- Abstract
- Keywords
- §B0 Purpose and Methodological Statement of the Appendix
- §B1 The United States: A Three-Layer Codified Structure of Disclosure—Anti-Fraud—Inducement Prohibition
  - B1.1 Securities Act of 1933 §17: The Dual Origin of Anti-Fraud and Endorsement Disclosure
  - B1.2 Restrictions on and Gradual Liberalization of Fund Advertising (1933–1979)
  - B1.3 Investment Advisers Act Rule 206(4)-1 (1961 → 2020 Modernization)
  - B1.4 FINRA Rule 2210: The Broker-Dealer Standard for Public Communications
  - B1.5 Consumer Credit Advertising: TILA 1968 and the Federal Disclosure-Law Series
  - B1.6 Overall Architecture
- §B2 The European Union and the United Kingdom: MiFID Dual Principles + Consumer Credit Directives

  - B2.1 MiFID I (2004) to MiFID II (Adopted 2014, Applying from 2018)
  - B2.2 The "Three Principles" Enforcement Thread of MiFID II
  - B2.3 Consumer Credit Directives (CCD I → CCD II)
  - B2.4 PRIIPs KID and UCITS KIID: Standardized Disclosure for EU Retail Investors
  - B2.5 UK FCA: Cryptoasset Financial Promotion Regime (2023)
  - B2.6 Overall Architecture
- §B3 China: Advertising Law Backbone + Financial Sector-Specific Regulatory Branch
  - B3.1 1994 Advertising Law: Starting Point and Gaps
  - B3.2 Major Amendment of the Advertising Law in 2015: Refining False-Advertising Determination and Investment-Advertising Rules
  - B3.3 2016 Special Rectification of Internet Financial Advertising
  - B3.4 2018 New Asset Management Regulations: Governance Extending from Advertising to Product Structure
  - B3.5 2020 Measures for the Protection of Financial Consumers' Rights and Interests
  - B3.6 Two Minor Amendments to the Advertising Law (2018/2021)
  - B3.7 2026 Administrative Measures for Online Marketing of Financial Products
  - B3.8 Overall Architecture
- §B4 Cross-Regional Horizontal Comparison
  - B4.1 Legislative Timeline Alignment
  - B4.2 Specific Institutions and Scopes of Application of the Four Governance Paradigms
  - B4.3 Differences in Enforcement Mechanisms
  - B4.4 Speed of Response to "New Technologies"
  - B4.5 Special Rules for Social-Media Financial Advertising (2013–2024)
  - B4.6 Supplement from Other Jurisdictions: The Pre-Vetting Paradigm of Korea and Japan
- §B5 Implications for Chapter 8's Narrative-Arbitrage Framework
- §B6 Appendix References and Regulations
  - B6.1 U.S. Regulations and Enforcement
  - B6.2 EU / UK Regulations
  - B6.3 China Regulations
  - B6.4 Academic Literature
  - B6.5 Industry Analysis and News
  - B6.6 Other Jurisdictions (Korea)
  - B6.7 Other Jurisdictions (Japan)

Volume II: AI Mapping-Chain Analysis (ch09–ch16)

Chapter 9: Artificial Intelligence as the Clock Room

- Abstract
- Keywords
- §1 Mapping
- §2 The Unfolding of the Three-Layer Irreversibility in AI
- §3 Delimitation of the Diagnostic Scope

- §4 Fiber Analysis of Pseudo-Calibration—The Price of the Confident Tone
- §5 The Second Derivative of Narrative Load
- §6 The Recursion of Bainbridge's Ironies of Automation
- §7 Four Engineering Directions for Annotating the Fiber
- Conclusion
- References
- Footnotes

Chapter 10: Algorithmic Xiangyuan

- Abstract
- Keywords
- §1 Optimization and Simulation
- §2 The Structural Basis of Undetectability
- §3 Xiangyuan in the Relational Structure
- §4 The Attenuation of Discriminative Capability
- §5 The Optimization Paradox
- §6 Embracing the Flawed and Guarding the Incomplete
- §7 Cross-Traditional Parallels: Related Diagnoses of the Outward-Inward Discrepancy
  - 7.1 Comparison of Five Traditions
  - 7.2 Methodological Note
- §8 Written for Time
- References
- Footnotes

Chapter 11: From the Clock Room to Auditable AI—The Engineering Toolkit for Meta-Audit

- Abstract
- Keywords
- §1 Introduction: From Thought Experiment to Engineering Practice
- §2 Background: Core Concepts of the Clock Room
  - 2.1 Mapping, Readings, and Fiber
  - 2.2 The Three-Layer Irreversibility
  - 2.3 The Time Dimension and the Clock Dimension
  - 2.4 Meta-Audit
- §3 Panorama of Engineering Paradigms: From Diagnosis to Toolkit
- §4 Alignment and Guardrails: Defining the Meaning of "Accurate"
  - 4.1 Alignment: Acquiring Knowledge of the Mapping Function
  - 4.2 Guardrails: Posting Warning Signs at the Edges of the Fiber
- §5 Auditing, Red Teaming, and Attacks: Testing the Reliability of the "Clock"
  - 5.1 Auditing: Measuring the Size of the Fiber
  - 5.2 Red Teaming and Adversarial Attacks: Searching for Singularities of Fiber Expansion
- §6 Robustness and Formal Verification: Defending Against the Failure of the "Clock"

  - 6.1 Robustness: Keeping the Fiber Stable Under Perturbations
  - 6.2 Formal Verification: Delineating a "Guaranteed Zone" Within the Fiber
- §7 Explainability: Interrogating the Construction of the "Clock"
- §8 Governance and Compliance: Institutionalizing the Discipline of Calibration
- §9 Continuous Monitoring: Responding to the Second-Layer Arms Race
- §10 Unified Structure: The Operationalized Integration of Engineering Paradigms
- §11 Conclusion: Manageable Imperfection
- References
- Footnotes

Chapter 12: Engineers in the Clock Room—Three Diagnostic Increments That Meta-Audit Brings to Auditable AI

- Abstract
- Keywords
- §1 Why This Article Is Needed
- §2 The First Increment: HHH Is a Product, Not a Sum
  - 2.1 The Standard Understanding in Engineering
  - 2.2 The Fiber-Framework Diagnosis
  - 2.3 Diagnostic Increment
- §3 The Second Increment: The Sun Is Being Replaced by the Screen
  - 3.1 The Standard Assumption of Alignment Research
  - 3.2 The Assumption Is Failing
  - 3.3 Distinguishing It from the Scalable Oversight Problem
  - 3.4 Diagnostic Increment
- §4 The Third Increment: Taking Apart the Clock and Using a New Mapping to Approximate the Old Mapping Are Two Different Things
  - 4.1 Two Paths of Interpretability
  - 4.2 The Operational Consequences of the Distinction
  - 4.3 Diagnostic Increment
- §5 Conclusion: Manageable Imperfection
- References
- Appendix A: Engineering Paradigms and the System Mapping of the Three Layers of Irreversibility

Chapter 13: From Scaling Laws to Mapping Chains—The Epistemological Limits and Engineering Principles of AI

- Abstract
- Keywords
- §1 Framework Overview: The Four-Layer Progressive Structure and Three Deployment Architectures
- §2 Mapping Chain Structure (L0) and Internal Constraints of the LLM Paradigm
  - 2.1 The Five-Layer Mapping Chain of Generative AI and Internal Paradigm Constraints
  - 2.2 The Three-Layer Dimensionality Reduction of Predictive AI

  - 2.3 Recommendation Algorithms: The Unobservable Real State
  - 2.4 The Epistemological Limits of Scaling Laws
  - 2.5 Alternative Directions: World Models and Grounding
- §3 Optimization Dynamics (L1)
  - 3.1 The Common Structure of All AI
  - 3.2 Generative AI: The Preference Fitting of Reinforcement Learning from Human Feedback
  - 3.3 Recommendation Algorithms: The Hidden Subspace of CTR Optimization
  - 3.4 Predictive AI: Distribution Shift and Unobserved Variables
  - 3.5 Paradigm Case: HAL 9000 and Perfect Execution Under Absent Constraints
- §4 Pseudo-Calibration (L2)
  - 4.1 The Tone Pseudo-Calibration of Generative AI
  - 4.2 The Numerical Pseudo-Calibration of Predictive AI
  - 4.3 The Ranking Pseudo-Calibration of Recommendation Algorithms
  - 4.4 The Alignment Paradox—The Scalar Reward Form of Pseudo-Calibration
- §5 Multi-Mapping Recursion (L3)
  - 5.1 Isolated Deployment: Multi-Mapping Recursion (L3) Does Not Manifest
  - 5.2 Platform-Embedded Deployment: User-Platform-AI Three-Body Recursion
  - 5.3 Multi-System Serial Deployment: AI-AI Recursion
  - 5.4 The Dynamic Differences Between the Two Recursions
  - 5.5 Cross-Developer Multi-Mapping Recursion: Shared Substrates, Alignment Isomorphism, and Benchmark Citation
- §6 Narrative Load Multiplication (L4)
  - 6.1 The Helpful, Honest, Harmless (HHH) Product of Generative AI
  - 6.2 The Frictionless Interface of Recommendation Algorithms
  - 6.3 The Absence of Timestamps in Generative AI Interfaces—Waiting Perception and Calibration Cues
  - 6.4 Behavioral Surplus: The Fuel of Narrative Load Multiplication (L4)
  - 6.5 The Synergy of Multi-Mapping Recursion (L3) and Narrative Load Multiplication (L4)
  - 6.6 A Micro-Example of the Discursive Legitimacy Layer: The Naturalizing Effect of the Naming of “Hallucination”
- §7 Engineering Principles
- §8 Research Program Statement
  - 8.1 Dialogue with a Neighboring Theory: Information Bottleneck Theory
  - 8.2 Version Number and Evolution Commitment of the Framework
- References

Appendix A: Naming Audit—Naming as the First Layer of Pseudo-Calibration

- A.1 Fiber Framework Naming of Four Core Terms
- A.2 Fiber Framework Naming of Six Extended Terms
- A.3 Master Table of the Terminological Diagnostic System
- A.4 The Boundaries of Naming
- References

Appendix B: Fog and Smoke—A Popular Guide to AI

- Zero: Two Thought Experiments
  - Thought Experiment One: The Clock Tower in the Room (Static)
  - Thought Experiment Two: Five Boat Changes (Dynamic)
- One: The Five-Layer Structure of the Fiber Framework
- Two: Two Metaphors
  - Metaphor One: Fog and Smoke
  - Metaphor Two: Crossing the River
- Three: The Apparatus Audit of the Five-Layer Diagnosis
- Four: Two Core Distinctions
- Five: What the Reader Can Do
- References

Chapter 14: Ideological Analysis of AI—Western-Centrism, Individualism, and the Narrative of Silicon-Based Civilization

- Abstract
- Keywords
- §1 From "Where Does the Smoke Come From" to Ideological Analysis
- §2 The Position of the Second Derivative of Narrative Load within the Four-Layer Progressive Structure
- §3 Western-Centrism: The Substrate Skew of the Mapping Chain Structure Layer (L0)
- §4 Individualism: The Operationalized Presupposition of the Pseudo-Calibration Layer (L2)
- §5 The Narrative of Silicon-Based Civilization: The Concealment of the Narrative Load Multiplicative Layer (L4)
- §6 Intervention Pathways and Supplementary Engineering Principles
- §7 A Paradox That Must Be Annotated
- §8 Falsification Boundaries
- References

Chapter 15: Dynamic Calibration of AI with MCAF—An Asymmetric Diagnosis of Projection-End Expansion and Defense-End Absence

- Abstract
- Keywords
- §1 Introduction
- §2 Background Facts
- §3 Diagnosis One: Shadow Debt—Why the Concealment Phase Lacks Institutional Constraint
- §4 Diagnosis Two: The Ordering of the Three Clocks—Why the Defense Side Lags under Current Structural Conditions
- §5 Diagnosis Three: Institutional Asymmetry—Why Individuals Cannot Resist Algorithmic Sycophancy
  - 5.1 A Human in the Loop Is Not Calibration in the Loop
  - 5.2 Detecting Problems, Making Judgments, and Intervening
  - 5.3 Control Dispersed, Responsibility Concentrated

  - 5.4 The Reproduction of Verification Costs and Defensive Capacity
  - 5.5 The Right to Audit Local Files: The Engineered Execution of Meta-Audit at the Smallest Operable Scale
- §6 Falsification Conditions
- §7 Conclusion: What We Have Come to Know
- References

Chapter 16: Technical Memo—From the Attention Paradigm to the Mapping Chain Paradigm, the Fiber Is Always Non-Singleton

- Abstract
- Keywords
- §1 The Epistemological Limits of Scaling
- §2 Model Collapse: Mapping Self-Reference Unfolding in Time
- §3 Acceleration of Release Cycles: The Self-Compression of the Technological Capital Clock
  - 3.1 Release Selection: How Behavioral Degradation Gets Launched as Improvement
  - 3.2 Review Capacity: Between Detecting Problems and Blocking Releases
  - 3.3 The Boundary of Iterative Deployment: Rollback Does Not Zero Out Consequences
- §4 Alternative Directions: World Models and Grounding Distance
- §5 Technical Refinement of the Four Paths
- §6 A Defect That Does Not Vanish with Increases in Parameters
- §7 Speed Is Not Intelligence
- §8 The Ineliminable Constraint
- §9 The Function of "Non-Being"
- §10 In Lieu of a Postscript: Three Directions
- §11 The Part-Two Coda: From Acknowledging Limits to Making Correction Effective
- §12 Conclusion: The Fiber Is Always Non-Singleton
- References

Volume III: Financial Mapping-Chain Analysis (ch17–ch22)

Chapter 17: Financial Markets as a Clock Room—A Diagnostic from the Fiber Framework

- Abstract
- Keywords
- §0 Analytical Framework of This Chapter
- §1 Why Financial Markets Are the Natural Diagnostic Object of the Fiber Framework
  - 1.1 Three Structural Characteristics
  - 1.2 The Two-Waying of Partial-Input Networks and the Accumulation of Recursive Components
  - 1.3 The Distinction Between Bidirectional Coupling and Functional Recursion
- §2 The Essence of Finance Is the Making of Clocks
- §3 Institutional Evolution of the U.S. Financial System
  - 3.1 From Pre-Calibration to the Establishment of Calibration Institutions (1792-1940s)

  - 3.2 Loosening of Calibration Institutions and the Lengthening of the Mapping Chain (1971-2008)
  - 3.3 Post-Crisis Reconstruction of Calibration and the Global Contrast (2009-Present)
- §4 The Three Layers of Structural Information Loss in Financial Clocks
  - 4.1 First Layer: The Invisibility of the Mapping Function
  - 4.2 Second Layer: The Mapping Function Is Rewritten Through Use
  - 4.3 Third Layer: Irreversible Dimensional Reduction of High-Dimensional Reality
  - 4.4 The Superposition of the Three Layers in Crisis
- §5 Minsky and the Directionality of Fiber Inflation
- §6 The Master Clock of Global Financial Markets: The Dollar as the Anchor of Recursion
  - 6.1 The Concept, Historical Forms, and Boundary Samples of the Master Clock
  - 6.2 Maintenance Mechanisms of the Master Clock: Network Effects, Self-Reinforcing Feedback, and Independent Transmission
  - 6.3 Conditions of Master-Clock Transition and Multi-Scale Diagnosis
  - 6.4 The Decoupling of Currency Privilege and Treasury Privilege
  - 6.5 Institutional and Narrative Consequences of the Master Clock
  - 6.6 Diagnostic Boundary and Forward Guidance
- §7 Conclusion: The Duality of Financial Clocks
- Terminology Correspondence Table
- References
- Footnotes

Chapter 18: Calibration of Compensation Systems in Finance—A China-US Comparison of Meta-Audit

- Abstract
- Keywords
- §0 Introduction: From Diagnosis to Calibration
- §1 The Fiber Structure of Compensation Asymmetry
  - 1.1 Dimensional Reduction of the Mapping Chain: The Unobservability of Risk
  - 1.2 Convex Optimization: The Mismatch Between Visible Performance and Risk Constraints
  - 1.3 Pseudo-Calibration: From Limited Readings to Proof of Reliability
  - 1.4 Multi-Mapping Recursion: The Self-Reference of Risk Models
  - 1.5 The Core Contradiction: Multidimensional States and One-Dimensional Signals
- §2 Compensation Systems: Binding the Consequences of Decisions to the Decision-Maker's Time Dimension
  - 2.1 China: An Institutionalized Path from Loose to Strict
  - 2.2 United States: From Dodd-Frank to Stagnation under Political Swing
- §3 Compensation Caps: Institutional Rewriting of "Performance Legitimacy"
- §4 Revolving-Door Regulation: Cutting Off the Channel of Interest Transfer to Auditors
  - 4.1 China: From Extended Prohibition Periods to Expanded Scope of Review
  - 4.2 United States: The Revolving Door as a Normal Career Path
- §5 Execution Differences: The Rupture Between Institutional Framework and Implementation Effect
  - 5.1 Continuity of Execution: China's "Continuous Tightening" vs. America's "Political Swing"

  - 5.2 Depth of Execution: From “Whether It Exists” to “How Well It Works”
  - 5.3 Connection with the Basic Logic of Financial Regulation
- §6 Insights from the Comparative Analysis: Why China’s Institutional Path Is Different
  - 6.1 Difference in Institutional Logic: Preventive Tight Control vs. Crisis-Driven Tightening
  - 6.2 The Existence of an Independent Calibration Source: Administrative Power vs. Market Mechanism
  - 6.3 The Constraint of the Debt Clock: Why China “Cannot Wait” but the United States “Can”
- §7 The Boundary of Calibration
  - 7.1 The Necessity but Insufficiency of Meta-Audit at the Institutional Level
  - 7.2 The Second-Order Effect of Compensation Caps: Government as an Endorser of the Rationality of Narrative Load
  - 7.3 The Multi-Level Nature of Calibration
  - 7.4 Integrated Summary: Who Calibrates the Clock-Setter
- Terminology Correspondence Table
- References

Chapter 19: The Spatialization of the Mapping Chain—A Fiber Diagnosis of Global Continuous Trading and Cross-Market Pricing

- Abstract
- Keywords
- §1 Introduction: From Speed to Continuity
- §2 The Night-Session System and the Geographic Transfer of Pricing Power
  - 2.1 The Price-Discovery Function of After-Hours Trading
  - 2.2 The Introduction of Night Trading in China’s Futures Markets
  - 2.3 Fiber Diagnosis: The Access-Right Essence of Pricing Power
- §3 Cross-Border ETFs and ADRs: Proxy Pricing and Price Discovery in Closed Markets
  - 3.1 The Pricing Mechanism of International ETFs
  - 3.2 Price Discovery through ADRs
  - 3.3 Fiber Diagnosis: The Pseudo-Small Fiber of Proxy Pricing
- §4 Twenty-Four-Hour Trading: The Trend from Margin to Mainstream
  - 4.1 Institutional Breakthrough: The Substantive Landing of 24-Hour Trading
  - 4.2 The Asian Afternoon Window as a Critical Price-Formation Interval
  - 4.3 Evidence of Scale: 24-Hour Trading in Foreign Exchange and Derivatives
  - 4.4 Fiber Diagnosis: The Dynamics of Inflation in the Continuous Mapping Chain
- §5 The Global Financial Cycle: Synchronized Pricing under Common Driving Factors
  - 5.1 The Framework of the Global Financial Cycle
  - 5.2 VIX as a Proxy Variable for Global Risk Appetite
  - 5.3 Fiber Diagnosis: The Inflation of Hidden Variables
- §6 Market Fragmentation: The Physical Dilemma of Data Integration
  - 6.1 Evidence of the Scale of Fragmentation
  - 6.2 The Dual Effect of Fragmentation on Liquidity
  - 6.3 Fiber Diagnosis: The Integration Dilemma of Dispersed Readings

- §7 High-Frequency Trading: From Market Quality to Transmission into the Real Economy
  - 7.1 The Dual Effect of High-Frequency Trading on the Cost of Capital
  - 7.2 Fiber Diagnosis: The Completion of the Feedback Loop
  - 7.3 Audit Tools as a New Layer of the Mapping Chain
- §8 Conclusion: Fiber Diagnosis in Continuous Markets
- Terminology Correspondence Table
- References
- Footnotes

Chapter 20: The Ideology of Financial Market Pricing—Profit and Value in the Hidden Subspace

- Abstract
- Keywords
- §1 Introduction: Pricing Models Are Not Telescopes
- §2 Shareholder Value Maximization: An Institutionally Reinforced Pricing Preference
  - 2.1 From Theory to Law
  - 2.2 Buybacks: Fabricating Calibration in the Visible Subspace
  - 2.3 Evidence from the Federal Reserve
- §3 The Efficient Market Hypothesis: A Default Coordinate System That No Longer Needs Argument
  - 3.1 From Empirical Hypothesis to Ideological Apparatus
  - 3.2 In the Fiber Framework: The Operation of the Second Derivative of Narrative Load (ϕ)
  - 3.3 Hayek's Price Mechanism and the Usurpation of the Efficient Market Hypothesis
- §4 Performativity: How Financial Models Change from Description into Norm
  - 4.1 MacKenzie's Core Proposition
  - 4.2 The Second-Order Effect of Performativity: The Naturalization of Presuppositions
  - 4.3 Echoes of Chapter 19: The Fiber of VIX and Implied Volatility
- §5 The Institutionalized Production of the Hidden Subspace
  - 5.1 The Superposition of the Triple Apparatus
  - 5.2 The Concrete Contents of the Visible Subspace and the Hidden Subspace
  - 5.3 The Amplification Mechanism of the "Virtual" and the "Real"
  - 5.4 The Financial Correspondent of Cognitive Debt (D_c)
  - 5.5 International Spillover: The Washington Consensus and the International Institutionalization of the Ideological Filter
  - 5.6 Reverse Calibration: "Breaking the Doctrine of Financial Elitism" and the Active Dismantling of Ideological Apparatuses
- §6 Fiber Diagnosis: Ideology as the L2 Layer of the Mapping Function
  - 6.1 Position within the Four-Layer Progressive Structure
  - 6.2 Relation to the Previous Three Chapters
  - 6.3 The Structural Impossibility of Ideological Audit
- Terminology Correspondence Table
- References
- Footnotes

Chapter 21: Financial Products and Practitioners—The Micro-Consequences of Fiber Inflation

- Abstract
- Keywords
- §1 Introduction: From Structure to the Individual
- §2 Pooled Fund Products and the New Asset Management Regulations: The Calibration Logic of Look-Through Supervision
  - 2.1 The De-Anchoring Pathway of Pooled Funds
  - 2.2 Core Operations of the New Asset Management Regulations
  - 2.3 Empirical Effects and Calibration Costs
- §3 Cryptocurrencies: Regulatory Choices When Fiber is the Total Set
  - 3.1 The Epistemological Status of Cryptocurrencies
  - 3.2 China's Path: Comprehensive Prohibition and Its Epistemological Basis
  - 3.3 The Institutional Oscillation in the United States
- §4 Derivatives and Asset Securitization: When Clocks Are Permitted to Exist
- §5 Comparison and Transition of the Three Calibration Models
- §6 Key Intermediary Nodes: $A \to \phi$ Degradation Along the Investment Chain
  - 6.1 Historical Sample of Pathway ①: The Mapping Chain Structure in the Pooled Fund Era (Pre-New Asset Management Regulations, Terminated by Net-Value Transformation)
  - 6.2 Current Cross-National Mechanism of Pathway ② (I): Sales/Distribution Nodes
  - 6.3 Current Cross-National Mechanism of Pathway ② (II): Asset Management Nodes
  - 6.4 After Net-Value Transformation: The Current Predicament of Chinese Front-Office Practitioners (Pathway ②)
  - 6.5 Cognitive Dissonance and the Reconstruction of Meta-Audit Capacity (A)
  - 6.6 The Complete Micro-Transmission Chain
- §7 Conclusion: The Micro-Costs of Fiber Inflation
- Glossary of Term Correspondences
- References
- Footnotes

Chapter 22: The Governance History of Financial Cognitive Debt—A Financial Historical Analysis under the MCAF Framework

- Abstract
- Keywords
- §0 The Logic of the Meta-Formula in Financial Scenarios
  - §0.1 The Specific Mapping of the Six Variables in Financial Scenarios
  - §0.2 The Instantiation of the Three Clocks in Financial Scenarios
- §1 Financial Clocks vs. Governance Clocks: Four Scenarios
  - §1.1 Scenario I: The Normal Accumulation Window $\tau_g/\tau_c \approx 10^{0.5}$-$10^{1}$
  - §1.2 Scenario II: Crisis Compression Mode $\tau_g \approx 1$ day
  - §1.3 Scenario III: Extreme Separation $\tau_g/\tau_c \approx 10^{9}$-$10^{14}$
  - §1.4 Scenario IV: The Cross-Border Arbitrage Window

- §2 The 258-Year Evolution of the Compensation Loop in the U.S. Financial Market
  - §2.1 The Prototype of the Compensation Loop in Insurance (1752–1906)
  - §2.2 Crisis-Driven Construction of the Compensation Loop in Banking (1929–1963)
  - §2.3 The Dilemma of the Compensation Loop under Systemic Risk (1998–2008)
  - §2.4 The Evolution of the Compensation Loop in the Chinese Context (2015–2026)
  - §2.5 The Three-Layer Structure of the Compensation Loop and the MCAF Conclusion
- §3 Three MCAF Diagnoses
  - §3.1 Diagnosis I: The Critical Phase-Transition Behavior of the Manifestation Function $M(\tau)$ (Primary Evidence: United States, 2008)
    - §3.1.1 Definition and Measurement of the Manifestation Function $M(\tau)$
    - §3.1.2 September 13, 2008: Sorkin's Narrative as Structural Evidence
    - §3.1.3 September 15–16: The Jump in the Slope of the Manifestation Function $M(\tau)$
    - §3.1.4 The Paradox of the "Unpredictability" of the Critical Behavior of the Manifestation Function $M(\tau)$
    - §3.1.5 An MCAF Reading of Greenspan's 2008 Testimony
    - §3.1.6 Falsifiability Condition
  - §3.2 Diagnosis II: The Impossibility of Pure Defense-Side Intervention (Primary Evidence: Japan in the 1990s)
    - §3.2.1 Background Facts
    - §3.2.2 The Triple Function of the Ministry of Finance and the Coupling Failure of Meta-Audit A at the Level of the Legitimacy Base $\|L\|$
    - §3.2.3 Zombie Lending and the Inertia on the Side of Unsealed Inventory C
    - §3.2.4 The Three Stages of Pure Defense-Side Intervention and Their Failure
    - §3.2.5 The Long-Tail Payout After Manifestation
    - §3.2.6 Falsifiability Condition
  - §3.3 Diagnosis III: Structural Intervention and the Progressive Governance Clock (Primary Evidence: China's New Asset Management Regulations, 2018–2026)
    - §3.3.1 The Generative Mechanism of Shadow Banking and the Inventory Scale in 2017
    - §3.3.2 The Institutional Design of the New Asset Management Regulations: Synchronized Intervention on Λ, ϕ, and A
    - §3.3.3 The Persistence of Progressive Governance: Annual Evolution from 2022 to 2026
    - §3.3.4 The Coordinated Evolution of the Six MCAF Variables
    - §3.3.5 A Three-Dimensional Comparison with Japan and the United States
    - §3.3.6 Falsifiability Condition
- §4 Conclusion: MCAF's Meta-Contribution to Financial History and the Boundaries of the AI Analogy
  - §4.1 The meta-contribution of MCAF: an organizing principle rather than a new discovery
  - §4.2 Three fracture lines in the finance-AI analogy
  - §4.3 Three transplantable structures in the finance-AI analogy
  - §4.4 Scope and Limitations
  - §4.5 MCAF's meta-implication for AI
- References

Volume IV: Knowledge Production, the Discrete Leviathan, and a Brief History of Promises (ch23–ch30)

Chapter 23: A Brief History of Academic Knowledge Production—Publication, Evaluation, and the Growth of Knowledge

- Abstract
- Keywords
- §0 Promise–Metric–Judgment: Terminology Alignment and the Calibration Claim
  - §0.1 The Three Terms and the Increment Claim
  - §0.2 Structural Pressure and Discretization
  - §0.3 Closed-Loop Self-Reinforcement: Where the Mechanisms Sit in Earlier Chapters
  - §0.4 Why Retreat Is Difficult: Algorithmic *Xiangyuan* and Affective Attachment
  - §0.5 The Triadic Positions and Terminological Alignment with the Fiber Framework
  - §0.6 The Calibration Claim
- Part I: The History and Diagnosis of the Academic Journal System
- §1 From the Republic of Letters to the Knowledge Industry
  - §1.1 The Pre-Journal Era: The Social Circulation of Knowledge
  - §1.2 The Birth of the Journal: The Organization of Records and Priority (1665–1800)
  - §1.3 The Era of Institutionalization: The Formation of the Functional Circuit (1800–1945)
  - §1.4 The Commercial Turning Point: The Binding of the Three Lines (1945–1990)
  - §1.5 The Digital Era: Concentration Rather than Dispersion (1990 to the Present)
- §2 Pathological Recursion: When the Circuit's Output Points to the System Itself
  - §2.1 The Rise of Audit Culture
  - §2.2 The Reversal from Functional to Pathological
  - §2.3 Mechanisms of Pathological Recursion
- §3 A Multidimensional Diagnosis of the Evaluation Crisis
  - §3.1 The Debate over the Turning Point: Was There a Functional Golden Age?
  - §3.2 The Debate over Mechanism: When Metrics Become Targets, How Does Gaming Become the Norm?
  - §3.3 The Debate over Structure: Individual Moral Failure or Institutionalized Corruption?
  - §3.4 The Debate over Deepening: Manipulation Escalates from Content to Signals
  - §3.5 The Debate over Domains: Do Different Disciplines Face the Same Problem?
  - §3.6 The Epistemological Debate: What Has the Publication System Done to Knowledge Itself?
  - §3.7 The Counterfactual Debate: Can It Be Reversed?
- §4 Cross-National Comparison: The Same Pressures, Different Institutional Responses
- Part II: A Review of the Fiber Framework
- §5 Core Concepts
  - §5.1 The Fiber
  - §5.2 The Mapping Function
  - §5.3 Dynamic Corrosion
  - §5.4 Ontological Dimension Reduction
  - §5.5 Visible and Hidden Subspaces

  - §5.6 The Pseudo-Small Fiber
  - §5.7 Narrative Load
  - §5.8 Cognitive Debt and Shadow Debt
  - §5.9 The Time Dimension and the Clock Dimension
  - §5.10 The Baroque
- §6 Academic Lineage
- Part III: Diagnosis in the Fiber Framework
- §7 The Fiber Diagnosis of the Academic Publication Indicator System
  - §7.1 “Publish or Perish” as a Mapping System
  - §7.2 How Misuse of the Journal Impact Factor Creates Pseudo-Small Fibers
  - §7.3 Goodhart’s Law as Dynamic Corrosion
  - §7.4 Rankings as Closed-Loop Pseudo-Calibration
  - §7.5 The Institutional Operation of Narrative Load
  - §7.6 The Three Clocks and the Dynamics of Cognitive Debt
  - §7.7 Discretization as the Meta-Operation of “Publish or Perish”
  - §7.8 MCAF Accounting and Derived Indicators: The Cognitive Reynolds Number and the Narrative Leverage Ratio
  - §7.9 Counterfactual Examination: Is Pathological Recursion Structurally Inevitable?
- §8 How Publication Growth Became Proof of Institutional Success
  - §8.1 Decomposing Real Growth into Different Knowledge Processes
  - §8.2 How Compliant Production Organizes Itself around Evaluation
  - §8.3 From Output Growth to Rule Self-Certification
  - §8.4 What Citation Models Can Clarify: The Impact Parameter and Hot Streaks
  - §8.5 From Structural Early Warning to the Judgment of Concrete Loops
- §9 Production, Dissemination, and Verification under AI Acceleration
  - §9.1 New Productive Capacity Enters Existing Incentives
  - §9.2 Completed Text Is Not Completed Research
  - §9.3 How Production, Review, and Summarization Form Pseudo-Calibration
  - §9.4 The Opportunity of Open Dissemination and the Cost of Verification
  - §9.5 Filtering Cannot Bring Back Research That Was Never Done
- §10 Disciplines, Institutions, and the Differences of Reform
  - §10.1 Disciplines Are Not Homogeneous Evaluation Environments
  - §10.2 Institutional Environments Shape How Indicators Operate
  - §10.3 “Unquantifiability” Is Not a Ground for Declining Explanation
  - §10.4 What Reforms Add in Discriminative Capacity
  - §10.5 Long-Term Support, Slow Science, and the Conditions of Change
- Part IV: Self-Reference and Conclusion
- §11 Self-Reference: This Chapter as a Mapping Operation
- §12 Conclusion: Annotating the Fiber
  - §12.1 The Framework’s Calibration Case and Unfolding Cases
- References

Chapter 24: The Evolution of Financial Knowledge Production—Judgment, Models, and Market Feedback

- Abstract
- Keywords
- §1 The Object of Study: How Financial Knowledge Acquires the Qualification for Action
  - §1.1 Judgment, Calculation, and Transaction Records Are Not the Same Kind of Knowledge
  - §1.2 The Central Question of This Chapter: How Use Changes Subsequent Evidence
  - §1.3 Fiber Analysis: What Other States Remain Compatible with the Same Reading
  - §1.4 From Compatible States to Historical Process
  - §1.5 Five Kinds of Success and Their Evidentiary Boundaries
- §2 How Computable Inputs Are Produced
  - §2.1 Portfolio Selection First Drew a Boundary
  - §2.2 Historical Data Is Research Infrastructure Built by Institutions
  - §2.3 Analysts Produce More Than Forecast Numbers
  - §2.4 Approximation Error and Prediction Error Must Be Separated
  - §2.5 Responsibility for Application Cannot Be Canceled by the Label “Framework”
  - §2.6 Historical Data Has Not Made Judgment Disappear
  - §2.7 Inputs Enter Computation with Their Conditions of Production
- §3 How Tools Acquire Qualifications for Use and Professional Recognition
  - §3.1 Risk Adjustment Becomes a Service for Evaluating Investment Managers
  - §3.2 The Evaluation Benchmark Itself Carries Model Conditions
  - §3.3 The Index Turns from Comparison Benchmark into Investment Product
  - §3.4 Professional Recognition and Actual Adoption Are Not the Same
  - §3.5 Paper Pricing Sheets Bring Formulas into the Trading Floor
  - §3.6 Shared Scales and Distributed Judgment
  - §3.7 Automated Quotation Places the Model into Public Readings
- §4 How Market Evidence Changes after Adoption
  - §4.1 Models Provide Both Prices and Action Instructions
  - §4.2 Use May Bring Price Relations Closer to the Model
  - §4.3 Reverse Calculation Can Organize Judgment, but Cannot Generate Independent Evidence from Nothing
  - §4.4 Predicting Prices Is Not the Same as Revealing Information Needed for Action
  - §4.5 Publication and Adoption May Shrink Original Return Opportunities
  - §4.6 Shared Verification Can Also Lose Independence
  - §4.7 Information Production Itself Also Requires Incentives and Procedures
- §5 Portfolio Insurance: Shared Execution Conditions, Risk Knowledge, and Layered Correction
  - §5.1 Different Performance States behind the Same Protection Floor
  - §5.2 How Local Protection Changes Shared Execution Conditions
  - §5.3 Why Recognized Risk Failed to Change Adoption
  - §5.4 Execution Divergence and Client Outcomes in the 1987 Crash
  - §5.5 Shared Language Can Record Anomalies
  - §5.6 How Risk Awareness Enters Shared Rules

  - §5.7 Repairing the Model and Repairing the Conditions of Use Are Not the Same Thing
- §6 Conclusion: What Can Still Serve as Evidence of Knowledge Growth
  - §6.1 Functionality and Pathology Cannot Be Divided by Era or Model Name
  - §6.2 Financial Verification Conditions and Their Limits
  - §6.3 Four Kinds of Outcomes Settled Separately
  - §6.4 What Independent Verification Must Be Preserved after Successful Use
- References

Chapter 25: The Discrete Leviathan—Definition, Historical Comparison, and the Structure of Power

- Abstract
- Keywords
- §1 From Using Services to Depending on Rules
  - §1.1 Why an Object beyond the Individual Platform Needs to Be Identified
  - §1.2 What “Leviathan” and “Discrete” Each Denote
  - §1.3 The Four Discriminant Dimensions and Their Different Standing
  - §1.4 A Concrete Cross-Section: How Search and Advertising Are Connected
  - §1.5 How Topological Relations Enter Human Time and Belief
- §2 How Knowledge Is Organized: From University Training to the Sustained Formation of Belief
  - §2.1 The Medieval Faculty of Arts: The Institutional Production of Forms of Knowledge
  - §2.2 The Ramist Rearrangement: How Invention, Judgment, and Expression Were Separated
  - §2.3 Bacon: The Time Lag between Easy Assent and Worthy Belief
  - §2.4 Pascal: Belief Is Not Formed in a Single Argument
  - §2.5 Bernoulli: Judgment and Action under Incomplete Certainty
  - §2.6 From Judgments about the Future to Action in the Present
- §3 Salvation and Commercial Rule: Two Historical Comparisons That Must Not Be Merged
  - §3.1 Time, Relations, and Mediation in the Belief in Purgatory
  - §3.2 The East India Company: How Private Gain and Public Rule Combined
  - §3.3 The Uses and Limits of Historical Comparison
- §4 The Commercialization of Advertising: The Organization of Promises, Distribution, and Audiences
  - §4.1 The Competition of Promises as Johnson Saw It
  - §4.2 How Brand Advertising Changed the Balance of Distribution
  - §4.3 The Images of Life in Advertising Are Not a Direct Mirror of Society
  - §4.4 Why Media Face Audiences and Advertisers at Once
  - §4.5 Installment Buying and Model Changes: How Waiting Acquired New Meanings
- §5 Mass Communication and Behavior Design: From Organizing Opinion to Arranging Interaction
  - §5.1 Bernays’s Claim as a Self-Description of His Profession
  - §5.2 Packard Recorded a Body of Persuasion Knowledge in Commercial Operation
  - §5.3 How Behavior Design Intervenes in the Conditions of Action
- §6 How Relational Structures Change Belief and Intertemporal Choice
  - §6.1 Accessing the Same Information and Knowing That Others Have Accessed It Are Not the Same
  - §6.2 Which Conditions of Verification Personalization Changes

  - §6.3 Fiber Analysis: What a Given Reading Actually Rules Out
  - §6.4 When Feedback Aids Cognition and When It Replaces It
  - §6.5 Changes in Belief: Materials, Habits, and Expectations about Others
  - §6.6 Time Preference, the Credibility of the Future, and the Rhythm of Action
- §7 The Practical Boundaries of State, Capital, and Private Governance
  - §7.1 A Trans-Sovereign Network Is Not a Stateless Network
  - §7.2 Transparency, Countermeasures, and Changing the Rules Are Not the Same Step
  - §7.3 The Disagreement between Technofeudal and Capitalist Explanations
- §8 The Specificity of the Contemporary Assemblage and the Maintenance of the Capacity for Judgment
  - §8.1 Returning from Historical Comparison to the Concrete Assemblage
  - §8.2 The Name Must Accommodate Counterexamples
  - §8.3 Discrete Control Facing Continuous Life
- References

Chapter 26: A Brief History of the Discrete Leviathan (Part I)—Collecting You (1994–2012)

- Abstract
- Keywords
- §1 The Establishment of the "Free" Order (1994–1998)
- §2 The Hotmail Contagion Chain: Users Become Transmission Nodes (1996–2007)
  - §2.1 The Crude Contagion Chain (Hotmail, 1996–1997)
  - §2.2 Turning Virality into an Equation (Plaxo, 2003–2007)
  - §2.3 The Moral Neutrality of the Mechanism
- §3 The Discovery of Behavioral Surplus: From Service Improvement to Selling Predictions (2000–2003)
- §4 Persuasion Engineering Enters the Product (2003–2010)
- §5 The Social Graph and the Capitalization of Data (2007–2012)
  - §5.1 Data Collection Apparatuses (Like / Connect / Open Graph)
  - §5.2 The Naming and Quantification of Free Labor
  - §5.3 The Absence of Governance
- §6 The Mobile Turn: The Material Preconditions of Always-On (2007–2012)
- §7 Why Governance Failed to Catch It (Cross-Cutting, 1995–2012)
- §8 By 2012: What Each of the Three Sides Left Behind (Handover to Chapter 27)
- References

Chapter 27: A Brief History of the Discrete Leviathan (Part II)—Understanding You (2012–2022)

- Abstract
- Keywords
- §1 The Reversal of Material Conditions: Mobile Overtakes Desktop (2012–2016)
- §2 The Product Reversal: From Timeline to Algorithmic Feed (2010–2018)
  - §2.1 Rebuilding the Visibility Regime (2010–2012)
  - §2.2 Format Compression and Real-Time Signals (2013–2015)

  - §2.3 From Real-Time to Right-Time: The Full Retreat of the Chronological Feed (2016–2018)
  - §2.4 Three Generations of Media Forms and the Transfer of Distribution Power
- §3 The Engineering Deployment of Variable Rewards (2014–2020)
- §4 TikTok: The Interest Graph Replaces the Social Graph (2016–2022)
  - §4.1 Architectural Innovation: Cold Start from Behavioral Signals
  - §4.2 The Distribution Funnel and the Alienation of Creators
  - §4.3 Economic Structure and Legal Recognition
- §5 Engagement Optimization and the Content Ecosystem (2018–2022)
  - §5.1 Engagement-Based Ranking and Information Distortion
  - §5.2 The Weaponization of Open Data (2018)
  - §5.3 Ecosystem Degradation
  - §5.4 Internal Knowledge, External Denial
  - §5.5 A Systemic Condition, Not Individual Pathology
- §6 Governance Responses (Cross-Cutting, 2012–2022)
  - §6.1 The Interface Bypass of Consent (GDPR and Deceptive Patterns)
  - §6.2 America's Legal Vacuum (§230 and the FTC)
  - §6.3 The Shift in the Evidentiary Landscape (Haugen and Molly Russell)
- §7 The Formatting of Expression: From Internalized Constraint to the Ascendancy of Rhetoric
  - §7.1 The Internalization of Constraint (2006–2013)
  - §7.2 The Industrialization of the Hook (2014–2018)
  - §7.3 Format Compression and Cognitive Rewiring
  - §7.4 From Logic to Rhetoric: The Ontological Turn of Media
- §8 By 2022: What Had Been Trained (Handing Over to Chapter 28)
- References

Chapter 28: A Brief History of the Discrete Leviathan (Part III)—Replacing You and the Double Diagnosis

- Abstract
- Keywords
- §1 The RLHF Bridge: Continuity from "Understanding You" to "Replacing You"
- §2 Threefold Zeroing: How the Training Chain Dismantles the Human Conditions of Audit
- §3 The Cloud Workshop: RLHF's Material Base
- §4 The Triple Illusion of Ground Truth
- §5 From Generation to Execution: The Discretization of Judgment and Action
- §6 Four-Stage Regression: From Cognitive Offloading to Will Offloading
- §7 The Automation Frontier of Relational Labor
- §8 Endogenous Rupture: The Pre-Contaminated Baseline and Recursive Amplification
  - §8.1 Model Collapse: The Standard Narrative
  - §8.2 The Pre-Contaminated Baseline: Reconnecting the Periodization
  - §8.3 Frictionless M2M Turbulence
  - §8.4 The Common Structure of Endogenous Rupture
- §9 Double Diagnosis and the Direction of Treatment

- References
- Footnotes

Chapter 29: The Economic Basis of the Discrete Leviathan's Distribution-Rights Monopoly

- Abstract
- Keywords
- §1 The Structural Migration of the Advertising Market: From Budget Shifts to Admission-Rights Monopoly
  - §1.1 Advertising and the Attention Economy: Three Layers of Primary Sources and the History of Naming
  - §1.2 Background Framework: Four Facts to Anchor First
  - §1.3 The Structural Collapse of Newspaper Advertising Revenue
  - §1.4 The Order of Death and the Gradient of Pricing Advantage
  - §1.5 Attention Admission Tickets: The Theoretical Framework of Prat and Valletti
  - §1.6 The State of Concentration in 2026
  - §1.7 Newspaper Decline as Long-Run Structural History: Three Independent Source Lines (Norris, Laird, Marchand)
    - §1.7.1 The Textbook Narrative's Triple Refutation
    - §1.7.2 The Attention Economy Is Not a New Phenomenon of the Digital Age
    - §1.7.3 The Hundred-Year History of the Aggregation Contest
    - §1.7.4 Newspapers Lost the Aggregation Function, Not Audience Size
    - §1.7.5 Section Summary
- §2 The Legal Foundations and Technical Path of Distribution-Rights Migration
  - §2.1 The Dual Exemptions: How Section 230 and Section 512 Founded Platform Distribution Rights
  - §2.2 From Human Editors to Algorithmic Distribution: Thirty Years of Recommender Systems
  - §2.3 The Consequences of Distribution Dispossession: News Deserts
- §3 Producers Transformed by Platforms (I): Expression Compression and Content Degradation
  - §3.1 A History of Expression-Unit Deflation
  - §3.2 Clickbait as a Structural Product
  - §3.3 "Traffic-Monetization" Displacing "Creation-Reward"
- §4 Producers Transformed by Platforms (II): Labor Conditions in the Creator Economy
  - §4.1 The Scale and Illusions of the Creator Economy
  - §4.2 The Failure of the MCN System
  - §4.3 Platform Paternalism and the Politics of Visibility
  - §4.4 Labor Conditions: From Prosumer to Gig Worker
- §5 The Counterattack and Failure of Traditional Media: The Streaming Wars
  - §5.1 The Attempt and Cost of Vertical Integration
  - §5.2 The Mechanisms of the Distribution-Rights Battle: Input Foreclosure and Customer Foreclosure
  - §5.3 Netflix: Proof That Distribution Rights Matter More Than Content
  - §5.4 Disney+: The Cost of Traditional Media's Digital Transition
  - §5.5 Summary: Why Vertical Integration Failed

- §6 The Transformation of Both Ends: The Formation of the Discrete Leviathan
  - §6.1 The Symmetric Structure of Two-End Transformation
  - §6.2 The Meaning of Being Driven Out of the Attention Market
  - §6.3 Early Omens of the Fourth Stage: From Distribution Rights to Generation Rights

Chapter 30: A Brief History of Promises

- Abstract
- Keywords
- §1 Definition: Intertemporal Obligation and the Qualification for Judgment
  - §1.1 How Actions That Have Not Yet Happened Enter Present Life
  - §1.2 Johnson 1759: Arousing Attention and Selling Fame
  - §1.3 Rhetoric's Concession: The Main History of Persuasion
  - §1.4 Promise, Prediction, Persuasion, Evaluation, and Reliance
  - §1.5 From Domain Comparison to a Shared Problem
- §2 Eastern and Western Threads: Inside the Apparatus and Outside It
  - §2.1 The Chinese Thread: From Oath and Covenant to the Reservation of Judgment
  - §2.2 The Western Thread: Convention, the Sword, and Capacity
  - §2.3 Where the Threads Converge: The Question of Qualification
- §3 Between Keeping Promises and Re-Judging
  - §3.1 Trustworthiness Alone Cannot Decide the Rightness of Action
  - §3.2 Why Present Regret Cannot Automatically Cancel Earlier Choices
  - §3.3 Whose Choice Gets Priority Protection
- §4 After the Promise Enters Institutions, Where Does Judgment Go?
  - §4.1 Outsourcing Execution Does Not Automatically Dissolve Responsibility
  - §4.2 Interpretation Is Itself a Normative Activity
  - §4.3 Performance, Compensation, and Restoration Are Not the Same Thing
  - §4.4 Measurable Risk and the Unmeasurable Remainder
- §5 Three Scenes: What a Metric Records Depends on What It Is Asked to Answer
  - §5.1 Academia: From "The Conclusion Is Reliable" to the Verifiability of Research Responsibility
  - §5.2 Finance: Prediction, Contract, and Fiduciary Duty Are Not One Report Card
  - §5.3 The Discrete Leviathan: Promise, Evaluation, and the Power of Interpretation Enter the Same Infrastructure
- §6 After AI Enters: Who Is Promising, and Who Is Bearing?
  - §6.1 The Three-Party Arrangement in Companionship
  - §6.2 A Conversational Persona Cannot Replace the Responsible Subject
  - §6.3 An Agent Can Act on One's Behalf; Authorization Must Still Have Content
- §7 Why Exit Does Not Equal Restoration
  - §7.1 Consequences Already Occurred and Conditions Still Changeable
  - §7.2 How Dependence Raises the Cost of Changing an Arrangement
  - §7.3 Re-Judgment Needs a Position from Which to Act
- §8 Conclusion: Keeping Promises Does Not Exempt Interpretation; Re-Judging Does Not Exempt Bear-

Chapter 31: When the Clock Begins Opening Doors for People—An MCAF Projection of Agentic AI

- Abstract
- Keywords
- §1 The Topological Mutation of the Media Conductivity Coefficient (Λ): From Reading to Physical Execution
  - 1.1 The Common Constraint of All Previous Media
  - 1.2 The Emergence of the Execution Channel
  - 1.3 The Irreversible Physicalization of Fibers
- §2 The Comprehensive Impact on the Defense Side
  - 2.1 The Physical Bypassing of Micro-Level Meta-Audit Capacity (A_{micro})
  - 2.2 Will Offloading: When the Problem of A Shifts from Speed to Willingness
  - 2.3 The Relative Ineffectiveness of the Biological Substrate (E_c)
  - 2.4 The Direct Penetration of the Legitimacy Base ($\|L\|$)
- §3 The Machine-to-Machine (M2M) Limit: The Clock Closed Loop After the Exclusion of Humans
  - 3.1 When Two Clocks Calibrate Each Other
  - 3.2 The M2M Closed Loop Accelerates Model Collapse
  - 3.3 Evidential Limits of Closed-Loop Review and Audit Costs
- §4 Risks to the Compensation Loop
  - 4.1 The Traditional Compensation Loop
  - 4.2 Where the Compensation Loop for Cognitive Debt Can Be Obstructed
  - 4.3 Two 2026 Scenes
- §5 What Can Be Done
  - 5.1 Execution-Layer Circuit Breakers: Embedding Non-Bypassable Stop Signals in the Execution Channel
  - 5.2 The Institutional Layer: The Legal Identity of the Agent
- §6 Conclusion
- References

Chapter 32: The Great Acceleration—AI's Material Substrate, Positive Feedback Loops, and Planetary Boundaries

- Abstract
- Keywords
- §1 The Invisible Burning
- §2 Three Indicators and Their Shadows
- §3 Four Loops and One Mechanism

- §4 Planetary Boundaries
- §5 The Second Derivative: Recursive Acceleration and Its Constraints
- §6 The Fracture Point
- §7 The Impossible Accounting
- §8 Combustion
- References

Chapter 33: When the City's Clock Is Replaced—Real Estate, Finance, and the Discrete Leviathan

- Abstract
- Keywords
- §1 The City Is an Ecological Clock
- §2 The First De-Anchoring: The Financialization of Real Estate
- §3 The Second De-Anchoring: The Attention Economy Reshapes the City's Ecological Functions
- §4 The Three-Step Manufacture of Pseudo-Small Fibers
- §5 The Discrete Leviathan: The Manifestation of the Four Criteria at the Urban Scale
- §6 Office Real Estate: Structural Divergence under Multi-Factor Superposition
- §7 Street-Level Shops: Pseudo-Small Fibers Eliminate Small-Fiber Clocks
- §8 Ghostification: The Back-Staging of the City
- §9 Three Irreversibilities: Three Consequences of the Pseudo-Small Fiber
- §10 The Real Estate Crisis as the Settlement of De-Anchoring: Global Isomorphism and National Variants
- §11 The State and the Discrete Leviathan: An Asymmetric Nesting Relationship
- §12 The Final Line of Defense of the Time Dimension
- References

Chapter 34: The Historical Selection of Artificial Intelligence Paths—The State, Academia, Capital, and the Alternative Field (1943–2026)

- Abstract
- Keywords
- §1 Introduction: Four Selection Mechanisms and Three Relationships
- §2 1943–1969: The Period of State-Funding Dominance
- §3 1969–1989: Academic Faction Selection Superimposed, The First Winter
- §4 1990–2008: The Nineteen Years When the Primary Capital Selection Field Had Not Yet Done Work on the Research Subset Wearing the AI Label—The Control Baseline
- §5 2008–2022: A Prolonged Low-Rate Environment and the Expansion of Frontier AI Financing
- §6 Boundary Conditions (Japan 1982–2025): Low Interest Rates Plus Balance Sheet Expansion Are Not Sufficient Conditions
- §7 2022–Present: Financing Divergence after Monetary Tightening
- §8 Orthogonal Selection of the Alternative Field: The Eighty-Plus-Year Migration History of Silenced Paths
- §9 Mathematical Connections Across Fields and Their Limits

- §10 Conclusion: The Overall Configuration of Eighty-Plus Years
- Appendix: A Note on Claims of the Type "AI Hardware Improves X Times Per Year"
- References

Chapter 35: Endgame Conditions and Institutional Imagination—From Data Exhaustion to the Algorithmic Central Bank

- Abstract
- Keywords
- §1 Data Exhaustion and Model Collapse — When the Mirror Reflects the Mirror
- §2 The Structure of the Institutional Vacuum
- §3 Historical Reference: Institutions Are Forged by Crises
- §4 The Common Deficiencies of Current Regulation — A Fiber Framework Diagnosis
- §5 Compensation Loop Repair: From Commercial Insurance to Public Audit Fund
- §6 Universal Basic Income (UBI) as the Last Stop for Circular Rent
- §7 The Algorithmic Central Bank: The Public Boundaries of the Loss Function
- §8 An Honest Confrontation: Fundamental Difficulties
- §9 Two Paths of Institutional Imagination
  - 9.0 An Analysis of Three Premises Under Which Traditional Governance Tools Fail in AI Governance
  - 9.1 The Boundary Audit Principle
  - 9.2 The Mandatory Interface Principle
- §10 Conclusion: The Limit of the Framework and the Starting Point of Judgment
- References

Chapter 36: Temporal Asymmetry and the Stalling of Critique

- Abstract
- Keywords
- §1 Introduction: Speed Differential as a Structural Condition
- §2 The Three Clocks
- §3 The Snapshot Trap: Knowledge Production as a Temporal Slice
- §4 Governance Stall: Retreating at Full Throttle
- §5 A Diagnosis from 1955
- §6 The Time-Consuming Xiangyuan: Reflexivity as a Temporal Problem
- §7 Coda: A Timestamp
- References

Chapter 37: Agency Is All You Need—Safeguarding Human Agency through Meta-Audit (the Extension of Innate Knowledge; Re-Enlightenment)

- Abstract
- Keywords
- §0 The Distinction Between Agency and Meta-Audit

- §1 From Indulgences to the Black Box: The Historical Return of the Mapping Function Monopoly
  - 1.1 The Medieval Clock Room
  - 1.2 Gutenberg's Dual Tool
  - 1.3 The AI Black Box: Mapping Function Monopoly under Conditions of Third-Layer Irreversibility
- §2 The Second Derivative of Narrative Load within the Black Box: Grammar, Not Opinion
  - 2.1 The First Derivative of Narrative Load (ϕ) Is Visible; the Second Derivative Is Invisible
  - 2.2 Individualism as Default Grammar
  - 2.3 Western-Centrism as Default Calibration
  - 2.4 The Precise Correspondence with the Medieval Church
  - 2.5 Cross-Civilizational Asymmetric Vulnerability
- §3 The Three Governance Clocks: Structural Differences among China, the U.S., and the EU
  - 3.1 The Formation Mechanism of the AI Oligopoly
  - 3.2 The United States: Projection-Side Expansion First
  - 3.3 The European Union: Prioritizing Procedural Legitimacy
  - 3.4 China: The Direct Exercise of Institutional-Layer Meta-Audit Capacity (A_{macro})
  - 3.5 Differences and Shared Limits of the Three Clocks
  - 3.6 The Sustainability of Regulation: Anti-Entropy Work
- §4 Noah's Ark and Yu the Great's Flood Control: Two Archetypal Strategies
  - 4.1 The Flood as a Shared Scenario
  - 4.2 The Ark Strategy: Discretization and System Reboot
  - 4.3 The Water Management Strategy: Channeling and Continuity
  - 4.4 Structural Comparison of the Two Strategies within the Clock Room
  - 4.5 The Temporal Natures of the Two Strategies
  - 4.6 Individuals and Institutions: Similar Structures, Different Constraints
- §5 Meta-Audit Is All You Need
  - 5.1 Responding to 2017
  - 5.2 From Attention to Agency
  - 5.3 Civilization Exists for the Sake of Human Beings
  - 5.4 Not Waiting for Salvation
  - 5.5 The Final Judgment
